**Look For Location
of Credit House**

Mr. Johnson of Three Hills, M.P. for Bow Valley, and Mr. Smart of the provincial government, were in town Tuesday looking for a location for establishment of a credit house.

Four locations—Friesen's Store, Scott's Store, the vacant store in the Leuszler Block and Mrs. Wilson's Store were examined, but decision as to a location will be made later.

Knox United Church Notes.

The sermon series on the SERMON ON THE MOUNT will begin next Sunday. This is the greatest of all sermons and may be said to be the Constitution of the Kingdom of God. Here is a summary of the teachings of the Master, and the pastor hopes to deal with this all-important theme in a worthy way. We urge a full attendance of all associated with our church during the whole of this series. A hearty invitation is extended to all.

The opening meeting of the Bible Study Class will be held on Friday next at the Manse.

There will be a meeting of the young people of the congregation on Monday next in the Church Parlor at 8 p.m. It is hoped that there will be a good attendance and that a Y.P.S. will be formed.

I hope to convey a few facts that will be of interest to our readers from time to time. Fact No. 1 is as follows: The number of families connected with the United Church as reported in the 1936 Year Book is 445 525. This is a gain over the highest number of any previous year of 6,406, and a gain since 1926 of 75 963. Surely with such a foundation the Church is in a position to render great services for the good of mankind. Are we doing our share?

School Track Meet.

The Rosebud Inter-School Athletic Meet, held at Didsbury last Friday, was very successful and the enthusiasm among the contestants was kept at high pressure throughout the meet. There was a good attendance and the events were pulled off with clockwork precision, great credit being due those in charge of the program for the smooth manner in which every event was executed.

Olds School athletes had the edge on the other schools and won the cup for the most points handily, with a score of 256. Didsbury was second with 164, Innisfail third with 128. Bowden gathered 103 points and Carstairs 44.

Leading point winners in the various competitions were:

Boys Senior A: L. Grisdale, Olds, 20 points.

Boys Senior B: R. Carleton, Didsbury, 23 points.

Boys Inter A: Bert Buhr, Didsbury, 18 points.

Boys Inter B: Bill Haldane, Olds, 20 points.

Girls Senior A: Mary Black, Olds, 18 points; M. Burns, Didsbury 16.

Girls Senior B: Marion Leckie, Olds, 30 points.

Girls Inter A: Ruby Campbell, Olds, 30 points.

Girls Inter B: Mary Cooper, Bowden, 30 points.

Junior Boys: Bobby Cooper, Bowden, 19 points; Eldon Foote, Didsbury, 16 points.

Junior Girls: M. McDougall, Innisfail, 28 points.

Winners in the various events for Didsbury School were:

440 Yard dash: L. Jenkins, 3rd place.

Boys half mile relay: Cunningham, Foote, McDonald, Jenkins, 2nd place.

Girls half mile relay: Burns, Barrett, Carleton, Cunningham.

Boys Senior A

D. Foote, 2nd place 100 yard dash and running broad jump.

O. McDonald, 2nd place in standing broad jump.

C. Cunningham, 2nd place in high jump.

Boys Senior B

Russell Carleton, 1st in 100 yards, standing and running broad jumps 220 yard dash and 2nd in shot-put. Don Phillipson, 2nd in 220 yards.

Boys Inter A

Bert Buhr, 1st in 100 yards, standing broad jump, 220 yards, and hop, step and jump.

Boys Inter B

John Holub, 1st in 100 yards, shot-put, and 3rd in standing broad jump.

Baillie Carleton, 1st in hop, step and jump, 3rd in 100 yards and 220 yards.

Lloyd Erb, 2nd in shot-put and 220 yards.

Ralph Edwards, 2nd in pole vault.

Girls Senior A

Margaret Burns, 1st in 50 yd. dash, softball throw, and 100 yd. dash, 3rd in hop, step and jump.

Girls Senior B

Betty Boorman, 1st in softball throw.

A. Cunningham, 2nd in 50 yd. dash and 3rd in 100 yard dash.

L. Carleton, 2nd in high jump.

Lois Edwards, 3rd in standing broad jump.

Girls Inter A

Lily Wilkins, 2nd in standing broad jump and high jump, tie for 2nd

**D.H.S. Girls Win
Basketball Game
Vs. Bowden Girls**

Running up a handy score of 16 4 the Didsbury High School Girls romped through a game with Bowden on Tuesday of this week. Betty Barrett and Marjorie Burns netted the most points for the Didsbury girls. Winnie Adshead, Gladys Geeson and Betty Boorman played some effective basketball on the Didsbury forward line. Displaying a tenacious quality which proved disastrous to the rushes of Bowden. Evelyn McGhee and Orpha Gabel were successful in guarding their hoop.

The courtesy of Messrs. Wilfred Klein, C. H. Adshead, J. V. Berscht and J. A. McGhee in providing transportation to Bowden was greatly appreciated by the Didsbury girls.

The following players represented Didsbury:

Betty Barrett, Betty Boorman, Winnie Adshead, Annetta Sheils, Gladys Geeson, Evelyn McGhee, Orpha Gabel, Vivian Caithness, Marjorie Burns, Captain. Mr. Don Cameron, Coach.

Final arrangements have been made for a basketball game on Thursday, October 15 (today) with Carstairs High School. The contest is to be held on the Didsbury School Grounds and the first whistle will blow at 4:45 p.m.

**Says West Headed
For Boom Growth**

Western Canada's progress towards complete economic recovery was far from being retarded by the recent drought, J. M. Davidson of Winnipeg, secretary of the Industrial Development Board of Manitoba, said in an interview last week. The West, he predicted, was slated for a period of growth that will surpass anything it has experienced in the last ten years.

in 75 yd. dash, 3rd in 50 yd. dash.

Mary Herbert, 1st in softball throw.

Girls Inter B

Winnie Moon, 1st in softball throw.

Bernice Tighe, 2nd in softball throw.

Marguerite Fisher, 3rd in 50 yard dash.

Junior Boys

Eldon Foote, 1st in standing and running broad jumps and 75 yard dash, 3rd in 50 yard dash.

D. Casey, 1st in softball throw.

**Agricultural Society
Will Hold Annual Mtg.**

The annual meeting of the Didsbury Agricultural Society will be held at the office of C. E. Reiber on Tuesday, October 20th at 2 p.m. All interested please attend.

**Dr. W. A. R. Kerr
Appointed Head
Of University**

Dr. W. A. R. Kerr, dean of the faculty of arts and sciences of the University of Alberta and senior dean of the faculty, has been appointed president of the University of Alberta in succession to Dr. R. C. Wallace, now president of Queen's University, Kingston, according to an announcement made by Premier Aberhart.

The premier's announcement was made following communication to him by Chief Justice Horace Harvey of the Alberta supreme court and chairman of the board of governors, University of Alberta, that the board heartily concurred in the government's selection of Dean Kerr.

**Curlers Will Organize
Coming Season.**

The Didsbury Curlers will hold their organization meeting on Monday evening, Oct. 19th, at C.P.R. waiting room. Election of officers and discussion of the program for the coming season will be the business. All curlers are asked to attend.

**Bible School Will
Hold Convocation.**

The opening convocation of the Mountain View Bible School will be held at the M.B.C. Church on Oct. 20 and 21. The time of the services will be 2.30 and 8 p.m. both Tuesday and Wednesday.

On Wednesday at 9 a.m. the students will register at the office of the Bible School.

Rev. J. J. Grout, of Washington will be the special speaker and other local help will be on hand. There will also be special singing.

At the Movies.

"Naughty Marietta," Victor Herbert's greatest musical comedy, with Jeanette MacDonald and Nelson Eddy, will be screened at the Opera House this Friday and Saturday.

The magnificent singing of these principals and the glamorous pageant of drama, mirth and beauty will thrill you more than any musical yet seen on the screen. The glorious voices of Jeanette MacDonald and Nelson Eddy pour forth the immortal melodies of "Ah, Sweet Mystery of Life," "I'm Falling In Love With Someone," and many other delightful hits. It is a magnificent musical picture and should attract a large following.

We are informed by Mr. Sharp that this week will be the last of the Wednesday evening performances at the movies. Until further notice pictures will only be shown Fridays and Saturdays.

Requisites For Safe Driving

The summer just passed has produced the usual crop of automobile accidents to drivers and passengers in the three prairie provinces. The daily newspapers have duly recorded numerous accidents together with the names of killed and injured and, when the information was available, the causes of these frequent disasters.

It is yet too early to record figures detailing the number of accidents and the toll of dead and injured. These will be available later, but indications are that there will be little, if any, reduction below the 1935 record, despite the safety first campaigns which have been waged by governmental authorities, automobile clubs and commercial organizations interested in the subject, through the public press, over the air and through motion picture presentation.

It does not necessarily follow that such campaigns are a failure, but it seems to indicate that public memory is short lived or that the capacity of automobile drivers to avoid accident, no matter how well-intentioned or how careful they may be, is below par. The latter is probably a close approach to correct diagnosis of the ailment.

Statisticians and experts working on figures and available data on the causes of automobile accidents in the United States last year came to the conclusion that the number of accidents arising from defective equipment or faulty mechanism is comparatively insignificant, from which it follows that the human element, the capacity and capability of the driver, is in the majority of cases, the factor mainly responsible for disasters on the highways.

In other words, a large percentage of automobile accidents, can be reasonably attributed to lack of training or lack of experience on the part of the driver and perhaps in many cases, a combination of the two. This statement does not take into account accidents which can be charged up against recklessness, alcoholism or criminal negligence.

Undoubtedly lack of training and lack of experience are the causes of a number of crashes and the opinion is gaining ground that a substantial percentage of accidents is caused by drivers who are ordinarily careful but who have not had sufficient experience to sense danger in time to avoid it or who, sensing a pending risk, are not skilful enough to resort to the proper course to follow in time to prevent disaster.

In view of these conclusions there is much to be said for the adoption of courses of training for those who intend to operate powerful and speedy motive vehicles over the highways. This might be followed by examination of applicants for operators' licenses for the first time, though it would not be feasible to insist on making such tests the sine qua non for the right to drive for those who have previously been granted licenses. Courses of such a nature, if properly carried out by competent persons would at least partially, if not completely, take care of lack of training.

As for accidents caused by lack of experience, these can only be overcome by experience, supplemented by instruction. That drivers can and do develop a form of road sense which warns them of impending danger is the testimony of Oliver Stewart, writing in a recent issue of The Observer of London, England, where the mounting accident toll is causing grave concern.

The writer explains that in course of time a driver learns to interpret small signs which a novice would pass unheeded. "A driver on a main road about to pass the entrance to a side road, suddenly slows down. No other vehicle is visible; yet as he reaches the side turning, a motor bicycle comes out of it and turns into the main road. If the driver is questioned as to the reason he slowed down before any other vehicle was visible, he will probably say: 'It's intuition'."

To Mr. Stewart that is not altogether a satisfactory explanation. He pointed out that in all probability the driver unconsciously registered some small sign that something was coming down the side road, a pedestrian turning his head in that direction or a flock of sparrows taking to flight from the ground or some other indicator.

"The swift interpretation of such things," says Mr. Stewart, "is road sense and it is acquired with practice; but it is much too rarely taught. At first the signs will be seen, but not interpreted; and, in the absence of specific instruction, it is only with long practice that the interpretation can be expected to come without delay."

Teacher: "Johnnie, you must bring a written excuse for being absent yesterday, from the head of your family."

Papa (to Johnny, four years old): "Won't you have another piece of duck, Johnny?"

Johnny: "Yes, please, father, I will."

Johnnie: "She's away on a fort-night's holiday, ma'am; shall I bring turkey?"

duck's my favorite chicken 'cept one from me father?"

An improvement in the gear wheels of dial telephones now permits them to live through 5,000,000 operations instead of 100,000 as formerly.

Market For Feeder Cattle

Seen In Old Country By Ontario Agricultural Minister

A good brisk market for Canadian feeder cattle was unearthed by Hon. Duncan Marshall during his recent stay in England and Scotland.

The Ontario Agricultural Minister predicted that this demand will continue this fall. William Henderson, one of the "Old Country" cattle feeders, held the same opinion, the Minister said. The British Government bonus on beef is one of the props of this "feeder" market. Canadian cattle can qualify for the bonus after a three-month stay on British pasture.

Mr. Marshall said Canadian horses were also selling at good prices and very quickly in the Old Country.

"There is a market right now for more," he said. "Scotland has not got enough horses to do its work."

May Increase Duty

Britain Likely To Get Revenue From Foreign-Made Flags

Foreign-made flags, pictures of the King and other articles suitable for the coronation may be subjected to higher import duties.

Increases are being considered on articles for use in or commemorating the coronation, or as souvenirs, which have a representation of the King or any member of the royal family, any royal emblem, or bear a flag of any country in the British Empire, or are in any way suitable for the coronation.

The groundhog and the woodchuck are the same animal, the former name being given to the animal in the eastern states.

Great Britain is standardizing all brass foundry products.

Sees Better Times

Secretary Of League Of Nations Paints Optimistic Picture

The turning-point in a world industrial depression has been passed, an official League of Nation's report declared.

The report, prepared by the secretary, Joseph A. C. Avenol, presents an optimistic picture and says despite political clouds the task of solving outstanding international economic problems has become easier, and the solution would help to dissipate political apprehension.

Avenol in the report attributed the failure of agriculture to share fully in the general improvement, to the protection of agriculture in the industrial countries.

Officials said the league's economic committee favors discussions among the powers as soon as political conditions permit.

Taking More Medicine

The growing consumption of medicine in England is worrying Sir Kingsley Wood, minister of health.

"We are rapidly becoming a nation of medicine drinkers," he said in a speech to the House of Commons.

The cost of medicine per head in England, he said, is double that in Scotland.

Although French is spoken by only 45,000,000 French men and women, it is understood and spoken by at least 75,000,000 other persons who are not French.

Last year more people visited Canada than lived here.

BLINDING HEADACHES MADE HER HELPLESS

Forced To Lie Down For Hours At a Time

Other sufferers from headaches will be interested to read this letter:

"Until last summer I was subject to very bad headaches. While they lasted I seemed to lose my sight and all power in my hands, and was forced to lie down for hours at a time. My aunt (who has taken Kruschen Salts for 12 years with beneficial results) suggested my trying them. I did so, and I've not had any return of those headaches for months, in fact I feel quite better. I shall always take Kruschen regularly in future." (Mrs.) M.W.

Headaches can frequently be traced to a disordered stomach, and to the unsuspected retention in the system of stagnating waste material which poisons the blood. The numerous salts in Kruschen assist in the complete elimination of waste matter, resulting in a purer blood-stream, and thus helping to bring relief from headaches.

IMAGINE AN "A" BATTERY which didn't have to be re-charged peak to the very end. And imagine that this battery gave perfect service not for just two or three months but for 1000 playing hours. Wouldn't you jump at the chance of having such a marvel in your own set?

The opportunity is yours! Your dealer has just such a battery. It's called Eveready Air Cell and does everything the ideal "A" battery should do. It actually maintains itself by simply breathing air—and its power scarcely fluctuates for 1000 playing hours.

wheels of dial telephones now permit them to live through 5,000,000 operations instead of 100,000 as formerly.

Plan For Stimulating Work On Repairs And Improvements To Homes

A plan under which the Dominion government will guarantee lending institutions against losses up to 15 per cent. for loans to a maximum of \$50,000,000 to home owners for repairs and improvements on dwellings, was announced by Prime Minister Mackenzie King and A. B. Purvis, chairman of the national commission on employment and relief.

The government is also working, it was stated, on a policy of providing low rental homes in urban centres, possibly involving slum clearance, and construction of houses of a class suitable for those whose incomes enable them to purchase when convenient payments can be arranged.

All this will be in conjunction with and dependent upon provincial, municipal and community co-operation.

At the same time it was announced steps were being taken in co-operation with the provinces, whereby single unemployed transients would be put to work in primary industry during the coming winter at wages as near as possible to the general prevailing rate.

The prime minister, Mr. Purvis and Hon. Norman Rogers, minister of labor, gave details of the broad policies on employment tentatively adopted. Some of them will require federal legislation at the next session, and some provincial legislation may also be involved. No special session would be required, the prime minister thought, but all preparations would be complete to introduce legislation when parliament meets in January.

Encouraged by the outcome of similar provisions made by the United States government, the intention is to extend the housing act to the extent that personal loans up to \$2,000 may be advanced to home owners without endorsement at a maximum of five per cent. interest for terms up to five years.

Guarantees against losses up to 15 per cent. of the total over a given period will be made by the Dominion government, the total maximum liability to be thus assumed to be fixed initially at \$7,500,000 covering \$50,000,000 worth of loans.

Following are detailed recommendations of the commission on home rehabilitation, which the government has tentatively accepted, as contained in an official statement:

(a) The Dominion to guarantee chartered banks and other responsible approved lending institutions against losses up to 15 per cent. of the aggregate value of loans made by each such institution for the financing of repairs and improvements of all kinds on dwellings;

(b) The limit of the aggregate loans to be \$50,000,000 and the limit of the government risk therefore \$7,500,000;

(c) The government to retain the right to announce at any time that no further loans will be guaranteed for all lending institutions or for a particular one;

(d) The government administrative action to be limited to accepting and recording loans for guarantee, receiving claims and paying them;

(e) The conditions which the lending institutions will have to meet to obtain the government guarantee to be:

(1) Maximum loans on one property, \$2,000.

(2) Loans to bear not more than five per cent. discount rate repayable in equal monthly installments over one year or a pro rata discount rate for other periods. No service or insurance charges nor any additional charges of any kind except as provided for arrears.

(3) Duration of loans, one to five years.

(4) Loans to be used for rehabilitating and improving existing real property owned by the borrower. Not for building on vacant land. Fixtures but not removable attachments or appliances to be considered as improvements.

(5) No endorsements to be required.

(6) Loans only to be made to owners.

(7) Stipulated penalties for arrears.

(8) Taxes, mortgage payments and etc., to be in standing acceptable to lending institutions.

Worked Chain Of Farms

Englishman Was Highly Successful But Used No Livestock

The story of how George Baylis of Boxford, Berkshire, made a fortune of almost £250,000 (\$1,250,000) by farming without livestock has been read with interest and surprise throughout the United Kingdom.

How he did it was explained at an agricultural conference at King's Lynn, Norfolk. Baylis' will was proved at £245,596.

C. S. Orwin, director of the Institute for Research in Agricultural Economics at Oxford University, told the conference that Baylis began farming in Berkshire in 1866 in the traditional way for grain and roots with bullocks and sheep.

After six years Baylis lost £600. Then he decided to abolish livestock from his farming system and grow grain by the application of ammonia and phosphates. He evolved a six-course rotation with three grain crops, two bare fallows and a clover crop.

Baylis made money while his neighbors either went bankrupt or stopped growing grain. Before his death he was farming 12,000 acres, half of which he owned. The only livestock on it was some 300 working horses.

The agricultural correspondent of the News-Chronicle writes: "It is perhaps fortunate for England that Baylis has not found many imitators. For his system was to acquire a chain of farms and work them with gangs of men who travelled round the enormous estates. Villages became obliterated in the process. Farms were either pulled down or allowed to decay."

Baylis grew nothing but grain. He was known as the barley king.

Discovered Something New

Texas Man Finds Geese Can Weed Cotton Fields

"Don't be a goose" has lost much of its sting as a term of approbrium in Van Zandt county, Texas. In fact, a goose is almost as good as a man. At any rate, five geese are as good as a man in the cotton field.

Some score of years ago, C. C. Simmons, a Van Zandt county farmer, faced a heavy loss unless he could find some means of eradicating the heavy growth of Johnson and crab grass spreading across his cotton field. In desperation he fenced his land and put a flock of geese in the field. He was surprised and gratified when the feathered tribe cleaned the field of the wild grass without damaging a leaf of the cotton.

This year, nearly all the farmers in the county use feathered farmhands to weed their cotton fields of undesirable grasses. It is estimated that 25,000 geese are being used for this purpose in the county. Five geese can do the work of one farmhand.

The geese have another advantage over human farmhands. The latter work "from sun to sun" while the geese average from 15 to 18 hours a day in the fields. They often take a siesta on hot days, from the middle of the morning until the middle of the afternoon, but make up for lost time by working on moonlight nights.

Substitute For Sunshine

Little pigs are now being fed cod liver oil during the winter in order to make up for the lack of sunshine, said Dr. G. I. Christie, president of the Ontario agriculture college, Guelph, in connection with the agricultural display from the college at the Canadian National Exhibition in Toronto. Use of scientific foods has vastly improved pigs in tests, he said.

Denmark now numbers its eggs so that they can be traced back to the farmer.

2169

Alcohol And Motor Driving

British Medico Gives Report Of Investigations

Dr. Horace Middleton Vernon, former investigator for the industrial health research board, told the British Association for the Advancement of Science alcohol makes the motorist's heart beat faster.

He informed the scientists exhaustive researches had shown incontrovertibly that whiskey makes motorists drive a bit faster and less accurately. Beer in reasonable quantities, however, was found to be comparatively innocuous.

Describing the tests which led him to these conclusions, Dr. Vernon said the National Institute of Industrial Psychology had rigged up a dummy automobile and created artificial conditions approximating road driving.

Then, he said, the National Institute of Industrial Psychology had bought drinks of whiskey and beer for 15 experienced motorists.

Dr. Vernon reported mild doses of beer seemed to have been downed by the motorists in their stride with little apparent effect on their performances.

But, he said, indulgence in more than one large shot of whiskey reduced by six per cent. the time of the driver's reactions.

Such indulgence, he said, further increased by 12 per cent. driving errors, with the motorists themselves giddily unaware of their shortcomings.

The association elected Sir Edward Poulton, former professor of zoology at Oxford University, next year's president to succeed Sir Josiah Stamp.

To Relieve Pain

Two New Developments Reported By Medical Science

The American Congress of Physical Therapy closed its annual meeting in New York with reports on two developments asserted to relieve pain.

Dr. Harold R. Hopkins, visiting surgeon, Johns Hopkins University, Baltimore, described how air containing oxygen was injected into joints to cushion them and bring relief from acute or subacute arthritis.

A single injection of air, he said, usually relieves "water on the knee."

Dr. Benjamin Ulanski, of Jefferson Medical College, Philadelphia, told how a stepped-up electric current was used to treat what is commonly known as "facial neuralgia" - a nervous ailment in the face with sharp shooting pains.

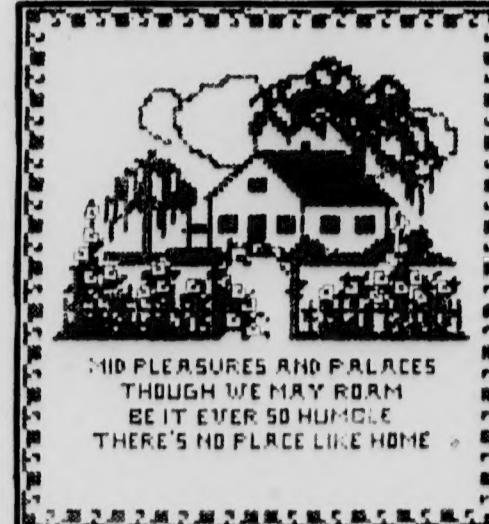

Something In A Name

Because the word "scribblers" applied to notebook, is said to have a bad psychological effect on primary school pupils, the more modern term of "work book" has been substituted by educational authorities in London, in the hope of making the children more ambitious.

Five hundred cases of art treasures are reported to be prepared for shipment from Peiping, China, to Shanghai and Nanking to assure their safety in case of war.

Wood shavings, not sawdust, are used to cover circus arenas.

Exciting New Beauty for Your Needle

Household Arts by Alice Brooks

Delightful Wall Panel Suggests "Home Sweet Home"

PATTERN 5310

This sampler is just the thing for the entrance hall or guest room. It's entirely in 8-to-the-inch cross stitch, except for the lettering. You'll find it fascinating to do in color. It would make an excellent gift for a bride-to-be. In pattern 5310 you will find a transfer pattern of a sampler 12 1/2 x 14 inches; a color key; material requirements; illustrations of the stitches needed.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg.

There is no Alice Brooks pattern book published.

The Garden Of The Future Will Be Enclosed In A Cloth House, Says Expert

Weeds Are Expensive

Cost Canada One Hundred Million Dollars Every Year

Perennial weeds cost the Dominion of Canada in the neighborhood of \$100,000,000 each year.

Facts to substantiate this statement and methods recommended to reduce the loss were exhibited in Dominion Department of Agriculture demonstration in the North Wing of the Government's Building at the Canadian National Exhibition, Toronto.

Sodium chloride sprayed over the ground kills all perennial weeds, but due to the expense involved, its use is only recommended for small patches.

Other methods for eradicating annual weeds include fall cultivation of stubble land instead of plowing; the use of a weeder or harrow when the weeds are small and the grain not more than two inches high; heavy rates of seeding grain crops smother annual weeds; spraying with a three per cent. solution of copper sulfate at the rate of 100 gallons per acre kills mustard.

For perennial weeds, plowing in midsummer followed by cultivation for the remainder of the season in order to keep down all top growth is recommended. Hood crops such as corn, or smother crops such as buckwheat, if grown for two years in succession, will eradicate most perennial weeds, it is claimed.

The cereal division, attracted considerable attention. Fifty years ago the experimental farms were established, and the exhibit this year celebrated its fiftieth anniversary.

Modernized Moscow

Miss Agnes McPhail Gives Impression On Visit To Russia

A modernized Moscow and systematized Scandinavian countries were impressions Miss Agnes McPhail brought back to Canada upon arrival from Europe.

Old Moscow is becoming modernized, the U.F.O. Labor member of parliament for Grey-Bruce, said. Cobblestone streets are giving way to asphalt thoroughfares, buildings are being erected, hotels opened, students centres organized and universities built.

Scandinavian countries also are advancing rapidly, she found. Cooperative systems in both Sweden and Denmark have been beneficial to the countries, particularly the former, where they have helped banish the depression.

The animal with a human face, two wings and a peacock's tail, which is supposed to have carried Mohammed to heaven, was called Alaborak.

Wood shavings, not sawdust, are used to cover circus arenas.

The garden of the future will be encased in a cloth house, declared Dr. George I. Christie, president of the Ontario Agricultural College in an interview at the Canadian National Exhibition, outlining results achieved through research work at the college.

"This year we erected a cloth house for plants the area of the average garden. We planted tomatoes, cauliflower, asters and lettuce inside the cloth house, and again in an area of equal size and in similar surroundings out in the open air. Where asters were from eight to 12 inches high with a blasted bloom and attacked by the aster beetle, in the open, inside the cloth enclosure we were able to grow them by the thousand with the most perfect stems 24 to 30 inches high, and in a mass of solid bloom.

"The cauliflower plants show almost as marked a difference. We feel we have conclusively proved the value of a cloth enclosure," he said.

"We used cheesecloth. We erected four posts eight feet high and strung wires to hold the cheesecloth in position. It was possible therefore for men to work with ease inside the garden.

"We found the cheesecloth increased the humidity of the air, prevented moisture from escaping by cutting off the movement of dry winds, and kept out insects. It was chiefly by means of the increased humidity that we were able to obtain such spectacular results, though freedom from insect attacks was an important factor in the growth," Dr. Christie explained.

In co-operation with the Hydro Commission the college plans to erect a new type of plant house to replace the greenhouse, Dr. Christie said. Instead of a glassed-in structure to allow all the possible sunshine to reach the plants, the plan calls for a house insulated with glass wool with a narrow light from above four feet wide calibrated for Guelph conditions. Lighting with electric bulbs, it is believed, will furnish sufficient heat for the plants.

The house is to be lined with metal in order to retain the highly concentrated carbon dioxide gas and which under present conditions escapes to a large extent, he said.

A further experiment which has shown definite results emanates from the poultry department of the college. "We have been feeding the juice of young grass mixed with buttonmilk and mineral material, and have been able to produce for the first time show birds with the color of legs and sheen of plumage which we want. The food apparently contains just the proper vitamins to produce the required effect. And there is a possibility of us taking young grass before it joints and saving it for winter to use in this feeding," he continued.

Virtue In Tomatoes

Discover Secret Of Population Increase On Virgin Islands

The division of territories and insular affairs believes it has discovered the secret of a population increase on St. Croix, one of the Virgin Islands. The cause, in brief, is tomatoes.

Until a couple of years ago the natives of this small island lived principally on cornmeal and fish, with occasional side dishes of sugar cane. The birth rate rocked along, the division explained, at about the same rate for years.

Convinced something besides sugar cane could be grown on St. Croix, the government introduced tomato plants.

Pretty soon, a division spokesman said, everybody was eating tomatoes and speaking favorably about the taste. At the same time the birth rate began an upward swing.

Owns Old Violin

A violin 186 years old is still in use at Edmonton, Alta. Owned and played by Robert Buchanan, it was made at Mittenwald, Germany, by Bartholomew Kramer in 1750. The instrument is valued at more than \$1,000. It has carried down the decades a glorious mellow tone.

In the Garden**

As soon as the tops of the plants are frozen or have died off, they should be removed and burned. If the tops of perennial plants are left on the bed all winter there is danger that they may harbour disease spores and insects which may have been present on the plants. As soon as the ground is frozen a mulch of old manure, straw or evergreen branches can be applied to help to hold the snow. Sometimes the stems of the plants are left for this purpose, but it is not recommended. Some plants which are frequently attacked by slugs can be protected by covering the crown with old coal ashes. The same thing is useful around fox-gloves and hollyhocks to prevent water standing in the crowns and then freezing. If the leaves of hollyhocks and foxgloves are very numerous some of them can be removed.

September and October are the months when spring flowering bulbs are planted, and clumps of them in a perennial border are greatly appreciated in spring. Besides daffodils and tulips, which can be obtained in many varieties and colors, there are other attractive bulbous plants such as *Chionodoxa* (Glory of the Snow), *Scilla*, *Siberia* (Siberian Squill), both of which have blue flowers, and *crocus*, which can be obtained in white, yellow and purple varieties. These are amongst the earliest of flowers to bloom in the spring. *Muscari* (grape hyacinth) with dark blue flowers like a hyacinth, bloom a little later.

Lilies are also grown from bulbs which should be planted in October. Some of the best and easiest to grow are *L. amabile*, *L. tenuifolium*, *L. regale*, *L. Willmottiae* and *L. Henryi*.

Burnside Notes.

Mrs. Joe Clarke spent Tuesday afternoon with Mrs. Ed. Anderson.

Mrs. Chas. Marden left last week for a month's visit with friends and relatives in Ontario.

Church services are being conducted every Sunday afternoon at 2:30 in the Burnside school, with Miss Zook in charge.

There will be a dance in the Lone Pine Hall on Friday, Oct. 23, with the Didsbury Five Piece Orchestra furnishing the music.

Sam McAllister spent the week end with Mr. and Mrs. N. Eckel.

Lone Pine W.I. met at the hall on Thursday afternoon last. A paper on "What it means to be a Canadian woman" was given by Mrs. Eckel and Miss Jean Hunter's paper on "Immigration," which was held over from last month was read. Next meeting will be held at the home of Mrs. Emily Hunter.

Messrs. Peter Gobert, Albert Spragg and Fred Metz were visitors at the Eckel home Sunday.

Hemstitching and Fancy Work Exchange Specialist in Knitted Suits and Dresses.—Mary McCann, Ground Floor, Petersen Bldg. (38)

Melvin Notes.

Mr. and Mrs. Godfrey Carlson were Calgary visitors Friday.

Miss Freda Smith, of Calgary, spent the holidays with Mrs. John Krueger.

Mr. and Mrs. Ed Parker were guests of Mrs. George Youngs on Tuesday.

Bruce Swingle, of Calgary, spent the holiday with his father Mr. Lee Swingle.

Frank Kynel and Lewis Bergeson who were with John Krueger all summer, have gone to Turner Valley.

Mr. and Mrs. Emil Krebs and family were dinner guests of Mr. and Mrs. Henry Fisher on Sunday.

Mrs. Jim Adams, of Springside, spent last week with Mrs. Charles and Mrs. George Youngs.

Mr. P. Daniels, of Calgary, spent Thanksgiving with Mr. and Mrs. Godfrey Carlson. Mrs. Daniels returning to the city with him.

Mrs. A. S. Taylor, of Breslau, Sask., is spending the week with her parents, Mr. and Mrs. Cowitz and other relatives.

Mr. and Mrs. Lawrence Chandler and family, and Mrs. Lee Swingle of Calgary, spent Sunday with Mr. and Mrs. Lloyd Chandler.

Miss Mildred Brown, of Crossfield, and Miss Florence Bissett of Irricana, spent the holidays at the homes of Mrs. Charles Youngs and Mrs. Wm. Davies.

Notes From the West.

Mr. and Mrs. O. Krebs were Sunday visitors at Mr. and Mrs. Hogg's.

Miss Oma Brown spent the week end with her parent's. She is attending the Tech. in Calgary.

Mr. and Mrs. Monck and family, of Calgary, were weekend visitors with Mr. and Mrs. W. Blain.

Neighbors and friends surprised Mrs. Shannon on Friday evening, it being the occasion of her birthday. Cards and dancing provided the entertainment.

Mr. and Mrs. Parker visited with Mr. and Mrs. McArthur, the former having just returned from a considerable stay in the Olds Hospital.

Mrs. J. Hosegood went to Calgary on Friday to spend a couple of days with her daughter Connie, who is in the Holy Cross Hospital recovering from an operation for appendicitis.

The Social Credit Group of Elkton held a concert in the school Saturday evening in aid of the Prophetic Bible Institute Sunday School Broadcast. Mr. Reade spoke very interestingly on the change in the European map. Messrs. M. Weber and H. Erb gave speeches on the work of the government. Mr. M. Campbell also addressed the meeting. Entertainment consisted of songs by Mrs. MacFarlane, Mrs. A. Hogg, J. Kynel, and Arnold Hogg. Musical items were rendered by Leslie and Kenneth Barnard and Bob Springer. Step-dancing by the Monck Sisters of Calgary was greatly enjoyed. The sum of \$12.00 was collected for this worthy cause. Mr. F. Byrt acted as chairman for the evening.

SNAP
THE GREAT
Hand Cleaner

**Lacombe Field Day,
Saturday, October 17**

An exceedingly interesting and instructive programme has been arranged for the Swine Breeders' Field Day at the Dominion Experimental Station, Lacombe, Saturday, October 17.

A. W. Peterson of the Dominion Livestock Branch, Ottawa, a well known authority on swine, will discuss the swine business from an angle new to the producer. In the course of his address Mr. Peterson will explain a number of points concerning which most breeders have only the vaguest of ideas.

During the last few years a great many hitherto unrecognized facts have come to light in the realm of breeding, feeding and management of bacon hogs. The field day program will include a review of the work with swine at the experimental station, with particular emphasis on recent developments.

Losses of young pigs were once considered necessary evils, but it has been discovered that they may be largely prevented by proper handling of the sow and litter. Such dreaded conditions as anaemia, rickets and similar diseases may be avoided by observing proper preventive measures.

These subjects, and many others of interest and also actual cash value to every swine breeder, will be dis-

cussed and explained by officials of the experimental station and the dominion livestock branch.

The programme will start at 1:30 p.m., but you are invited to come early and spend a couple of hours before lunch in going over the other phases of the experimental station's work. Bring a picnic lunch and make up a party of friends and neighbors. Coffee, cream and sugar will be provided for a basket lunch.

Doings of Our Neighbors

AT OLDS: Melvin Cipperley and father, G. H. Cipperley, returned from their airplane trip to Sioux City, Iowa. Their log shows they travelled nearly 15 hours on the trip down and 16½ hours on the return. Every kind of weather condition was encountered, the worst probably being a dust storm near Sioux Falls, S.D. Head winds at this point made it impossible to cover more than 70 miles in two hours.

The Olds town council have passed a new by-law regulating the sale of goods or merchandise on the streets or lanes of Olds. This new by-law prohibits the sale of goods or merchandise on the streets or lanes of Olds.

To Set Up Six Credit Houses for Edmonton

At least six credit houses would be established in Edmonton when payments of the social credit basic dividends began there, it was stated by William Bullock, in charge of registration in the capital city. Mr. Bullock said it was hoped a start in compiling registration forms signed in the city would be made this week with a staff of twenty. He estimated 28,000 had registered.

Policyholders Own the "Assets" of Life Insurance Companies

As a great co-operative enterprise, Life Insurance has built up Assets in Canada totalling, approximately, two billion dollars. Yet these Assets are relatively small when it is realized that they are jointly owned by about 3,500,000 policyholders—one-third of Canada's population.

On the average, each policyholder owns \$571 as his share of the total Assets in Life Companies operating in Canada. Obviously, the great majority of policyholders are men and women of ordinary means—thrifty people who, year by year, have entrusted to Life Insurance part of their savings so that they may have financial security against the uncertain future.

These policyholders represent the best type of Canadian citizens. They have sought to preserve their financial independence, and,

Now, however, there is a growing tendency to repudiate, by legislation, public and private debts, regardless of the debtor's ability to pay. Legislation which tends to destroy the ownership of public and private property places an unjust burden upon life insurance policyholders.

Informality Of The West

**Governor-General Is Addressed By
Mayor As Mr. Tweedsmuir**

Informality of the west greeted Baron Tweedsmuir, governor-general of Canada, when he visited a southern Alberta town, it was related at Medicine Hat.

"It's not often we meet such notable people as Mister Tweedsmuir here," said the mayor, dressed in his everyday clothes and a sweater.

It was the first time the governor-general had been addressed as "Mister" since his arrival in Canada.

"I found the salutation distinctly refreshing," said Baron Tweedsmuir.

There are 8,430,800 cattle and calves on the farms of Canada.

**WORLD HAPPENINGS
BRIEFLY TOLD**

Maine elected a Republican governor and three Republican congressmen in the recent state election.

The Dominion government will pay 100 per cent. of the cost of direct relief in drouth-stricken southwestern Manitoba. Premier Bracken announced.

C. W. Goyder, 28, who invented a radio transmitter and held the first two-way conversation between England and New Zealand, has been appointed engineer-in-charge of All-India radio.

Parcel post to the Yukon, owing to the close of navigation of the river, will be suspended from Oct. 1 to May 31, except for the post offices of Cardross and White Horse. The service will be suspended to Champagne from Dec. 1 to March 31.

Grain experts in Ottawa agree with a forecast from Chicago that Canada's wheat surplus will be disposed of by the end of the present crop year, July 31, 1937. It would not be necessary to sell as much as last year to accomplish this.

Arthur E. Cavanagh, general manager of the Temiskaming and Northern Ontario Railway, said that amalgamation of shop, car and yard facilities of the T. and N.O. and the Canadian National Railways at Cochrane is under consideration.

Calgary's application to the bondholders for reduction of interest rates to possibly three per cent. in order to save that city \$400,000 a year is to be taken up with the Investment Dealers' Association of Canada.

The League of Nations Society in Canada, announced appointment of Miss Elizabeth P. MacCallum, New York, as officer in charge of the newly-established international affairs information service to serve its members and the general public throughout Canada.

Former president of the Alberta Municipal Districts' Association, Frank H. Holmes, of Beaver Mines, Alta., has been appointed to the appeal board dealing with cases under the federal creditors arrangement in the province, it was announced.

A Famous Fisherman

**Zane Grey, Noted Novelist, Has
Broken Another Record**

Zane Grey, novelist and big-game fisherman, has broken another record by landing with rod and line a giant devil ray, off the Queensland coast, which weighed more than 1,200 pounds.

It measured 12 feet across the back and was 10 feet six inches long, he reported. It is one of the few giant rays ever caught with rod and line, and was landed only after a terrific struggle of nearly four hours.

The devil ray is a giant species of the stingray or "stingaree", and has been known to exceed 20 feet in width and half a ton in weight.

Grey recently broke the world's record by landing an enormous shark with rod and line off the New South Wales coast.

An Underground Home

**English Millionaire Is Building A
Bomb-Proof Wonder House**

The first bomb-proof underground home in Britain is to be built—for a millionaire—beneath a lonely stretch of beautiful meadowland in the heart of Hertfordshire.

This new wonder house will be specially air-conditioned and flooded with artificial sunlight, and according to experts, it will make a healthier home than the ordinary above-ground house because it will not be subject to air-carried infections.

New Surgical Operation

The possibility of a new surgical operation involving the repair of the heart is discussed in the annual report of the Royal College of Surgeons. The operation is designed to remedy certain conditions in which the heart muscles are atrophied. It involves a delicate "grafting" technique, the aim of which is to provide an alternative path of circulation through the heart.

It was the first time the governor-general had been addressed as "Mister" since his arrival in Canada.

"I found the salutation distinctly refreshing," said Baron Tweedsmuir.

There are 8,430,800 cattle and calves on the farms of Canada.

Every 100 seconds a road crash occurs in Great Britain. 2169

A Careful Broadcaster

**King Edward Very Particular About
His Radio Speeches**

A London dispatch describes King Edward VIII as emulating his father in the care with which he prepares radio utterances. As an example, the dispatch tells of last minute changes which King Edward made in his address dedicating the Canadian war memorial at Vimy Ridge.

In his original advance text, the king mentioned Rupert Brooke, the poet, by name and added "whose ashes lie in an Ionian isle." When he spoke he referred to Brooke as "one of our English poets," without naming him, and omitted the clause about his ashes. The dispatch does not make clear the reason for leaving out Brooke's name; but the king, an experienced broadcaster, recognized the tongue-twisting possibilities of "whose ashes lie in an Ionian isle."

Elsewhere in the speech, the king had written "today, 3,000 miles from the shores of Canada." He changed this to "thousands of miles," because he realized, according to the dispatch, that "Canadians living on the Pacific Coast, more than 6,000 miles distant, might feel aggrieved by neglect." And that was careful editing indeed.

Operated By Remote Control

**Driverless Car Observed All Rules Of
The Road**

Blaze New Yorkers gasped at a vacant automobile which observed all the rules of the road as it wove through traffic on a busy Manhattan street.

Patrolmen watchful for traffic violations investigated to find that the automobile was being operated by remote control by the driver of another car which preceded it.

They thumbed their traffic law book in vain to find an ordinance barring driverless cars and finally took the automobile and Harold Jonas to the police station.

Jonas explained that Charles A. Harnett, motor vehicles commissioner, had said he knew of no law barring remote control operation and had given permission for the experiment.

The police sergeant made an entry to this effect on the blotter and the driverless car moved down the street.

Supplanted By Wireless

**School Bells In Czechoslovakia Will
Not Be Used**

School bells are about to be supplanted. Children at elementary and some secondary schools in Czechoslovakia will be summoned by a wireless signal followed by a marching tune. There will then be a topical radio talk of suitable interest for five minutes, a short piece of classical music to train the children's taste, and finally a few bars of jazz to stimulate the spirit of gaiety and liveliness before actual lessons begin.

Britain's Colonial Empire

Speaking in Vancouver, Lord Tweedsmuir made a noteworthy observation in reference to the view expressed in some quarters that Britain should share her colonies among countries that lack colonies. "I would protest most strongly," he said, "against the notion that we won our colonies by a lucky gamble. We have been making our colonial empire for 300 years."

**Christie's
Biscuits**

"There's a Christie Biscuit for every taste."

Missing Landlord Found

**Did Not Know Building Was His
Until Tenants Fought**

George Ortseifen, a real estate dealer, was surprised to learn a six-flat building on Howe street, Chicago, was included in a parcel of real estate which came into his possession through a mortgage transaction.

He might never have found it out, he mused, if two of the tenants had not quarreled and gone to court, where incidental questioning revealed nobody in the building had paid rent for ten years because nobody knew who owned it. An investigation disclosed Ortseifen's unsuspected status of landlord.

His attorney said rent would be collected hereafter.

New Lie Detector

**Tests With New Device Prove Very
Satisfactory**

A new lie detector much more accurate than previous devices used in crime detection was described before the American Psychological Association.

Dr. W. G. Summers, head of the Fordham University department of psychology, told how tests with the "psychogalvanometer," on 50 groups of college students had detected the guilty with only two per cent. of error.

Older lie detecting machines known as "polygraphs" record on paper the blood pressure and heart beat of the person examined. Dr. Summers' instrument instead measures extremely small electrical current changes in the body.

For dining table use, aluminum tongs have been invented with which juice can be squeezed from pieces of lemon without spraying a table or staining a user's fingers.

Simple Crochet Makes Swagger Coat

**Household

SPICE BREAD
Temperature: 350°F. Time: 35 minutes
1/2 cup shortening; 1 1/2 cups brown sugar; 2 cups ROYAL HOUSEHOLD FLOUR; 1 1/2 teaspoons baking powder; 1/2 teaspoon salt; 2 teaspoons cinnamon; 1 teaspoon nutmeg; 1/2 cup sour milk; 1/2 cup chopped walnuts; 1 1/2 cups raisins; 2 eggs. Cream the shortening and gradually add the brown sugar which has been sifted. Sift together five or six times the flour, soda, baking powder, cinnamon and nutmeg. Add alternately with the sour milk to the first mixture. Add finely chopped nuts and raisins which have been dredged with flour. Bake 35 minutes in a moderate oven in a pan 9" x 12" which has been lined with waxed paper. Ice with caramel icing No. 1.

CARAMEL ICING NO. 1

1 cup brown sugar; 1 tablespoon butter; 1/4 cup cream; 1 tablespoon coffee; Icing sugar.

Mix together the brown sugar, butter and cream in a frying pan. Stir until sugar is dissolved and boil for two or two and a half minutes exactly from the time the whole mixture breaks into a boil. Remove from heat and add 1 tablespoon strong coffee. Beat in sifted icing sugar until mixture will spread easily.

Due To Physical Changes

Reason For Increase In Blood Pressure Is Explained

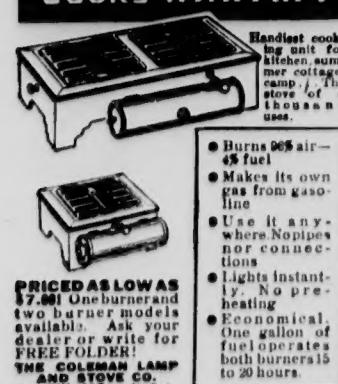

The rise in one's blood pressure is not due to the exercise itself but to physical changes, Prof. R. J. S. McDowell, president of the physiology section, said in a paper read at Blackpool, England, before the British Association for the advancement of science.

If exercise could be taken without psychical zest being involved—without the brain knowing the exercise was being taken—the blood pressure probably would fall, he said. This had been found to occur in horses.

Explaining that when a person exercises the blood pressure rises but falls even below normal when the exercise stops, Prof. McDowell said this had been explained as due to the accumulation of blood in the dilated muscles.

His observations led him to believe this theory was not wholly correct. He found the fall was due at least in part to a lessening in the resistance of muscles hardened during the exercise.

Coleman Hot Plate Cooks with Air!

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER VI.—Continued

"I know a few desert songs, too, Hassan," Starr told him. "The English words."

Michael grinned as he had every time she had called him "Hassan" since the first time. That fitted in, too.

"What could be sweeter?" he asked. "Practice up on 'em, Starr. I suppose your name really should be Suleika, or something of the sort, but we'll skip that since you insist on your own. . . . Maybe there ought to be an Arabian serving woman, with a lot of jingling anklets and a purple handkerchief over her head—"

"They're dirty," Starr said. "Any-way, I can wash my own back."

There were some interesting times during the next few days while they found and fitted up the apartment which should be the home from which "Play-Girl" would burst upon New York cataclysmically. Every moment was full. Starr had never imagined there could be such joy in marching into the smartest dress shops and merely making known her desires, when some sinuous manikin paraded before her, to become the possessor of the loveliest clothes that ever warmed any girl's heart.

There were a few other interesting moments, not quite such happy ones, when she went back to Mrs. Maloney's for her possessions. She was going to have all new clothes, of course, and such clothes! but there were a few cherished treasures at the Maloney place with which she did not want to part, even if she could hold onto them for only six months.

The landlady was all smiles and expansive when Starr paid her bill in full.

"No hard feelings, I'm hopin', Miss Ellison," she purred, "and I sure hated to lock up your clothes like that, but it's like I was tellin' you, you can't—"

"It's of no consequence, Mrs. Maloney," Starr assured wearily, as she moved by her to climb the steps to her hall room.

Mrs. Maloney, folding the bills to tuck inside her ample bosom, beamed.

"Well, you'll find everything okay, Miss Ellison," she insisted. "You got clean curtains, an'—"

"Oh, did I forget to mention that I would no longer be needing the room?" Starr drawled over her shoulder, but did not pause.

"You ain't? Where you think you're goin', Miss—the Waldorf?"

Starr smiled down on her from the head of the stairs.

"No." She shook her head. "I've taken a suite at Essex House while I'm furnishing my new apartment. It's quite comfortable."

Mrs. Maloney's eyes bulged. "You ain't kiddin'?"

Starr smiled wanly and her slight shoulders shrugged.

"Far from it. I—I'm taking a penthouse."

Her former landlady glared, and her lips shut tight. She opened them to snap:

"So it's like that, is it? It just goes to show y' never can tell. . . . An' there I was thinkin' you was a nice girl. . . ."

Starr let her go; did not make any attempt at explanation. But she was smiling oddly as she went on to do her packing. Let the woman think what she chose. It was of no consequence—any more than was anything else. Besides, this was good practice in the new role she was to assume.

Just an episode. Starr forgot it immediately in the excitement of having lunch with Michael Fairbourne and then going on to an art gallery that specialized in paintings of ancient Egypt. There were increasingly many of those luncheons and consultations, of necessity. At each one Starr was beginning to wonder if, in seeking a panacea for one hurt, she might not be rushing headlong into another. Michael was utterly impersonal in all his dealings with her, but that had nothing to do with the quickening of Starr Ellison's own heart.

Mr. CAFFEINE-NERVES . . . loses his grip!

WHILE many people can safely drink tea and coffee—there are a great many others who cannot. Maybe—without realizing it—you are one of these.

The caffeine found in both tea and coffee may be working day and night to rob you of sleep . . . to upset your digestion . . . to undermine your nervous system.

If, for any reason, you suspect that tea and coffee are harming you . . . try POSTUM for 30 days. There is nothing in POSTUM that can possibly harm you. It costs less than half a cent a cup—and it's easy to make. It's a delicious drink that may be a real help.

FREE—Let us send you your first week's supply of POSTUM free. Write for it to Consumer Service Department 101, General Foods, Limited, Cobourg, Ontario.

P8-26

If only he weren't so virilely good looking, her role would be so much easier. For, try to put it from her all she could, knowing that never must her heart give a thrill of love for any man—especially for Michael Fairbourne whose heart was already given to another—she could not disguise from herself how quickly she was responding to the magic clearness of his gray eyes, his masterfulness, the strength of his tall, athletic figure which he carried with the carelessness of being assured of himself. It was going to be hard, harder than she had thought. Bad enough to pretend to be such a she-devil as "Play-Girl," but with Michael-Hassan to complicate it—

"It's going to be some debut, Starr," Michael told her on the day the last of the furnishings came for her roof-top apartment and everything was set in place. He stood staring about him with happy eyes, glowing with that enthusiasm which was so much a part of him. "Some place, hey? It oughtn't to be hard to fit right into being a lady from Cairo with all this scenery, yes? Wait till some of the writing mob get an eyeful!" He laughed. "They're already all hot and bothered about meeting 'Play-Girl' and these rumors about her being part Egyptian are the finishing touch. . . . The office has done itself proud for your debut, and now it's up to you. . . . They have Pierre's ball room for the big event—no less—and all the moderns in the smartest of the smart set will be there. It's as I told you, Starr, all you've got to do is play up—Play!"

There was that far-away look in Starr's eyes as she smiled. "You're going to be surprised, Michael-Hassan, how I will play!" It was a small penthouse they had selected, overlooking the East River, but its long, low rooms were exquisite and ideal for their purpose. From the moment one stepped into the tiny hallway it was like stepping out of New York and precipitately into the East. Strange, tall perforated silver lamps stood all about, but it was the perfume that was the master touch—merely a suggestively lingering hint of perfume that spoke

to one intimately, an aroma that caught one by the throat, made him instinctively remember the perfume of a loved woman's hair when the face is buried in it.

"Pretty swell, eh?" Michael asked, his eyes searching about. "But if you ask me, I'd say those windows are the chef d'œuvre. Glad you remembered the name of that stuff, Starr."

Starr smiled. The windows were screened with mushrabiyah work. How could she ever forget that? Though it seemed an eternity since she had wandered through those streets in far-off Egypt and seen window after window of that sort. She said:

"I'm glad you don't want me to wear a veil when I look out of them."

Starr's bedroom struck a more modern note. There were touches of Egypt there, too, notably in the pile of exquisite enamel antique necklaces and bracelets which were heaped in an open jewel box of her dressing table, but on the whole the apartment was equipped as the boudoir of any New York debutante, with its great bed of rose silk and silver lace, the tall mirrors, the pillow-piled chaise longue and all the accoutrements necessary for aid in making a lovely woman all the more lovely. Through the open bathroom door there was a glimpse of a sunken rose-tiled bath. On the wall above it was painted a representation of ancient Egyptian bathing beauties, disporting themselves in a lotus-decorated pool. A far cry from Mrs. Maloney's hall bedroom.

There was that far-away look in Starr's eyes as she smiled. "You're going to be surprised, Michael-Hassan, how I will play!" It was a small penthouse they had selected, overlooking the East River, but its long, low rooms were exquisite and ideal for their purpose. From the moment one stepped into the tiny hallway it was like stepping out of New York and precipitately into the East. Strange, tall perforated silver lamps stood all about, but it was the perfume that was the master touch—merely a suggestively lingering hint of perfume that spoke

Ellison should do when Michael Fairbourne left her alone in her new home was to run to that great bed, sink her black head into its silk and lace pillows and cry, and cry, and cry.

Michael had done his preliminary work thoroughly. The Tarrance Publishing Company, too, had spread themselves, sparing no expense for their de luxe press stunt.

Trade Revival In Britain

Number Of Unemployed Reaching Lowest Mark In Years

Great Britain now has a record industrial army. Exclusive of agricultural workers the number of persons employed totals 10,961,000, the highest known.

During the four weeks ended Aug. 24 the total number of unemployed fell by 38,132 to 1,613,940 or 334,024 fewer than a year ago. It also was the lowest figure in six years.

Trade revival is reflected from many angles. The biggest theatre season for seven years has begun in London.

A boom in apartment building has begun. In all the great centres of population huge blocks are rising with accommodation ranging from the modest small flat to the luxurious apartment. The small flat is popular, particularly with Mrs. Newlywed and the retired couple wishing to escape the responsibilities of a house.

On Geranium Day in England \$42,500 was raised for the blind.

SOCIAL CREDIT NOTES

The Didsbury Pioneer Social Group held its last meeting at the home of C. Rapien on Monday evening. After business was dispensed with, a short program of musical numbers by Mr. and Mrs. Ed. Weber, a reading by Mrs. D. Jenzen and song by two girls were enjoyed by all. Next meeting will be held on Monday, Oct. 19th at the home of Mrs. C. Mack.

H. Ebb, Secretary.

Social Credit Study Group No. 1 held its regular meeting on Monday at the home of Mr. and Mrs. A. Schwesinger, with a good attendance. Correspondence was dealt with, including a letter from E. J. Poole, M.P. on his forthcoming meeting at Didsbury. Other business was then discussed. Lunch was served and a social evening spent. One new member was enrolled and some visitors were present.

Next meeting will be held on Monday, Oct. 26th.

Mrs. A. Schwesinger, Sec. Treas.

**Hundred Firms
Are Registered**

Fully 100 Alberta manufacturing firms have registered already under the provincial government's social credit plan, stated Hon. E. C. Manning last Thursday. Expressing his gratification with the response, the minister of trade and industry stated that the work of registering these firms was well underway throughout the province.

LOCAL & GENERAL

Jim McGhee spent Thanksgiving on the golf links at Innisfail.

Mr. and Mrs. Max Hearst, of Chipman, Alberta, visited at the Pearson home over the holidays.

Mr. and Mrs. Howard Halliday spent Thanksgiving with the former's mother at Calgary.

For Windbreakers and Sweaters go to T. E. Scott.

We have a complete line of Winter Shirts and Underclothing and Our Prices are Lowest—T. E. Scott

Mr. Frank Tyler who has had charge of the Sharp Circuit Shows here for the past two or three years, is moving with his family to Innisfail to take charge of the work at that point.

Westcott Social Credit Group will meet in the Westcott School on Monday evening, October 19 at 8. The secretary reports that the new registration forms will be on hand to be signed by the members.

Mr. and Mrs. J. E. Goode spent Friday and Saturday in Calgary, attending the convention of the Alberta Weekly Newspaper Association which was held at the Palliser Hotel.

Cooking School.—Demonstration of cooking will be held in the United Church basement on Friday, Oct. 16 at 2:15 p.m. Ladies are asked to bring pencil and notebook.

St. Cyprian's W.A. will hold their first whist drive of the season at the home of Mrs. Walter Pratt on Friday evening, October 16. Please come, everybody, and have a good time.

We carry a complete line of Men's Work Shoes from \$2.25 up.—T. E. Scott

**Have You Read
the CLASSIFIED?**

**Former N.H.L. Player
To Coach Olds Elks**

Manager Hans Hansen reports that he has contacted Gordon Savage, former N.H.L. player with the Montreal Canadiens, and that Savage has accepted the position of coach of the Olds Elks Hockey Club for the coming season. Having been down in the "big time" Savage knows plenty about the game and will no doubt be great help to the club.

A number of young fast hockey players have been interviewed and the prospects of Olds having one of the fastest teams in Alberta is a foregone conclusion, according to the hockey executive.

Golf Notes.

Frank Kaufman won the last round of the trophy competition, with a net score of 60 for 18 holes, and adds his name to the list of winners, which now reads: McGhee, Fleury, Fisher and Kaufman.

Semi-finals are now being played as follows: Fleury vs. McGhee and Fisher vs. Kaufman.

Finals will be played this weekend and it is expected that a large gallery will follow the two finalists.

Golf has certainly been the major sport in Didsbury this season and a large sign-up is expected by the Golf Club for 1937.

**Code Appointments
Approved By Board**

Naming of two administrators, one to be stationed in Calgary and the other in Edmonton, was approved when the permanent advisory committee which is assisting in administering the master retail code under the Trade and Industry Act wound up its session in Edmonton last Thursday.

George Weir is at present acting temporarily in this capacity at Calgary, taking over the duties as a result of W. D. King being appointed deputy minister of trade and commerce. The work at Edmonton has been handled up to the present by the department.

Hon. E. C. Manning, minister of the department, who attended the meeting, was not prepared to say when the permanent appointment of administrators would be made.

The code administrators will divide the province, one taking the southern districts and the other the northern sections. They will be in contact with members of the advisory committee and will deal with complaints or matters requiring investigation.

The committee also decided upon the boundaries of districts for the setting up of administrative units. As a result of the meeting, board members are to take up the formation of "local" committees to assist them in their work.

W. D. King was named permanent chairman of the committee, while the secretary is R. J. Gaunt, solicitor for the trade and industry department.

Miss Elsie Topley returned to Edmonton on Wednesday, where she has accepted a position on the staff of the Royal Alexandra Hospital.

Loyal Snyder, Milford Cressman, Ruby Traub and Grace Hunsperger motored to Edmonton on Friday. Leaving Miss Traub in the city, they picked up Miss Enith Hunsperger and drove to Vilna and Speddon to visit Mr. and Mrs. Harry Ford and Mr. and Mrs. B. C. Straughan. They returned on Tuesday.
